

Chris and Jack's Go-to Crypto Resources

Bitcoin Magazine: <https://bitcoinmagazine.com/>

This is our go-to resource for long-form articles that dive deep into critical developments in the cryptoasset space. While there is day-to-day coverage, we rely on it mostly for deep dives into complex topics.

BitInfoCharts: <https://bitinfocharts.com/>

While the user interface has historically been an eyesore, don't judge a book by its cover. The site is a data trove for information that's hard to find elsewhere, such as transaction characteristics, hash rate, rich lists, and so on for most all of the notable cryptoassets.

Blockchain.info: <https://blockchain.info/charts>

The best place for charts and easily downloadable CSV files of Bitcoin network statistics.

BraveNewCoin: <https://bravenewcoin.com/>

A bevy of resources from analysis, to APIs, to carefully crafted indices, BraveNewCoin is focused on providing professional-grade resources.

CoinCap: <https://coincap.io/>

One of the best mobile apps for getting a quick view of the latest market action on all the cryptoassets. It also has a website, but in our opinion the mobile app is the gem, and even includes a feature for tracking your customized cryptoasset portfolio.

CoinDance: <https://coin.dance/>

Touting itself as “community-driven Bitcoin statistics and services,” CoinDance is loaded with unique Bitcoin charts, including statistics on LocalBitcoins trading volumes, node activity, sentiment polls, user demographics and more.

CoinDesk: <http://www.coindesk.com/>

The ledger of record for the latest bitcoin, blockchain, and cryptoasset news. If you want to know what's happened over the last 24 hours, a skim of CoinDesk is your best bet.

CoinMarketCap: <https://coinmarketcap.com/>

Provides pricing and trading volumes for all cryptoasset markets, as well as charts for aggregate cryptoasset action. One of the sites we visit most frequently during the day when the markets are hot.

CryptoCompare: <https://www.cryptocompare.com/>

The site where we consistently download the most data on the widest array of cryptoassets, CryptoCompare not only gives great (free) data on trading and volume patterns, but also technical indicators, social media stats, developer activity, and more.

Education: <https://www.coursera.org/learn/cryptocurrency>

There are a growing number of quality courses available online that provide a deep understanding of bitcoin and cryptoassets. One of our favorites is the “Bitcoin and Cryptocurrency Technologies” course provided by Princeton University via Coursera.

Etherscan: <https://etherscan.io/charts>

The best place for charts and easily downloadable CSV files of Ethereum network statistics, as well as insight into the cryptotokens operating on top of Ethereum.

Exchange War: <https://exchangewar.info/>

An all-encompassing website to track the activity of different cryptoasset exchanges globally and their respective share in different trading pairs.

Google Alerts: <https://www.google.com/alerts>

To keep abreast of the latest news around bitcoin and cryptoassets, use the Google Alerts function to get an e-mail (usually daily) listing the latest news stories around your favorite keywords.

Smith + Crown: <https://www.smithandcrown.com/>

The most complete website for all things ICO, including past, present and future sales, with a fair amount of research interspersed throughout the site.

TradeBlock: <https://tradeblock.com/markets/>

As of writing, TradeBlock provides the most “Bloomberg-feeling” user interface for investigating cross-exchange action of BTC, ETH, ETC and LTC.

HIGHLY RECOMMENDED NEW ADDITION: One of the best listings of Bitcoin and Cryptoasset resources is from Jameson Lopp (@lopp - <https://twitter.com/lopp>) : <http://lopp.net/bitcoin.html>

Beyond these websites, we rely on Twitter most heavily for information, followed by a mix of focused Reddit, Slack, and Telegram groups. Our Twitter accounts are:

@cburniske - <https://twitter.com/cburniske>

@JackTatar - <https://twitter.com/JackTatar>
